- 3 **Break-Fast and Lunch**
- 4 **High Tea**
- 5 **Pack of 3 Webinars will be provided which has been done in the past on similar subject**

Overview:

I have conducted over 400 risk assessments for business associates and covered entities alike as well as worked directly with the Federal government in terms of auditing.

This seminar will go into great detail about what is going on in the HIPAA Security/ Privacy world. I will discuss why the government is all of a sudden going full bore in demanding compliance. You will learn risk factors to avoid, best practices you should be doing, and how to be proactive in your efforts.

In addition we are going to be discussing the methods in which patients can now sue under HIPAA and the steps they may be taking for civil remedy. On top of that what your practice or business needs to do so you can avoid the situation all together.

I will explain what is involved in a HIPAA audit, how it is done, why it is being done, risk factors, how to avoid an audit altogether, and what to expect if audited (from real life experience).

2 Days in persons Seminar

Agenda:

Day 1 Schedule
